Modular office systems →

ives for your productivity

Your Gain!

Success factor storage

Each organization has different goals. The important maxim for all is economic success. An organization is a closed loop which requires that all areas of the plant work together smoothly. One important aspect is the warehouse. Logistics and space have become ever increasing cost factors.

„The millions invested in logistics are investments in competitiveness.“

(Karl-Adolf Furbeth, Rewe, in the magazine "Handel" 12/98)

Expand your alternatives

As you know: future-oriented and farsighted decisions are more efficient than half-hearted solutions. This applies to reorganization and new planning as well. Space is limited and expensive. Good planning, on the other hand, saves money.

Future means: faster and better

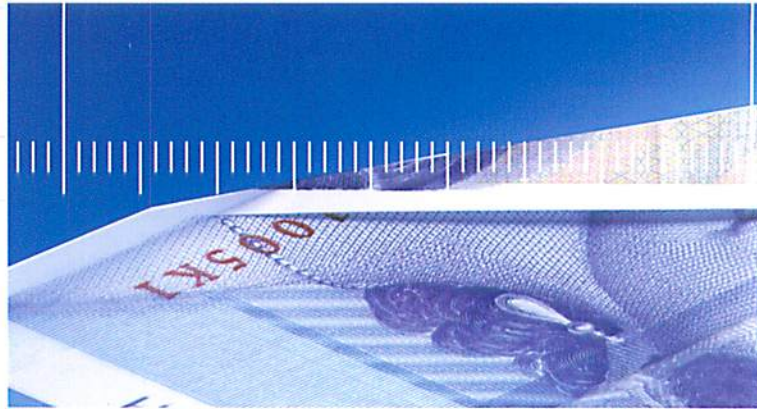

Fast and safe handling, optimized organization, fast turn-around times and the thus achieved improvement in deliverability positions you for success in the marketplace. The improvement of your competitiveness brings you more volume and higher profits.

When operations function well and safely, employees are motivated.

Achieve more together – it'

Tailor-made solutions

Space is an expensive luxury. Optimize its use with tailor-made shelving and modular office systems from GEMAC. When the logistics are on target, so are the economics. That's why we at GEMAC go to new heights with multiple level storage systems. You grow – and we are there helping you with all encompassing system solutions or with individual planning.

Profit from our experience

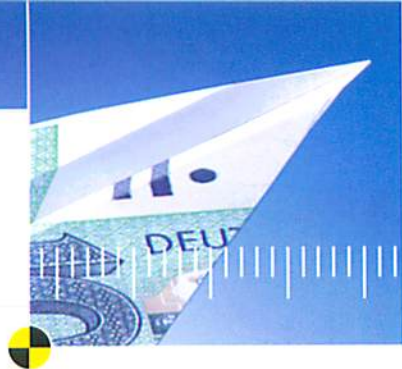

Quality...

As a member of the Manufacturer's Association for Storage Technology, we fulfill the criteria of the RAL certification „RAL-RG 614/2“. GEMAC-products are subject to constant quality control in our plant, government inspection as well as voluntary external inspections. This insures high standards and performance. GEMAC-products conform to the safety standards for warehouse equipment (ZH1/428 of the German Occupational Safety Association) and our modular partitions and office systems comply with applicable workshop ordinances.

... safety

Our pallet racks fulfill the requirements of the Euro-guidelines FEM 10.2.02. The static calculation of our racks and steel structures is in accordance with the latest release of the DIN 18 800.

s your money!

GEMAC finds economical solutions together with you – from the first steps of planning throughout the project and right up to the commissioning of the installation. The recipe for success is: take advantage of our know-how to achieve your goals in and around the economical warehouse.

Pleasant storage and work areas

GEMAC – The pleasant warehouse

Employee motivation is important: easy location of products, comfortable handling, safety – an all around good feeling at work and in the warehouse. That includes friendly colours, known to influence the well-being of employees and raise performance levels. We offer the complete pallet of RAL colours as well as special colours to conform to your corporate design.

GEMAC – your "feel good" offices

Our modular partition and office systems are the economical and variable solution that provide a pleasant working atmosphere.

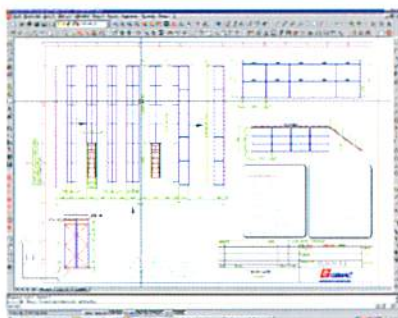

Universal service – fast and flexible

Be it planning, project management or final assembly – motivated GEMAC-employees are your responsible partners. We do everything we possibly can to satisfy you with our performance, even after decades of post order service.

Contact us per telephone, fax, e-mail or internet. Prompt service is a foregone conclusion.

Your planning system – GEMACAD

Our planning system keeps you up to date on the status of your project. Shelving systems, modular offices (with or without platforms) – we show you everything in an instant!

With GEMACAD we design solutions for you. Simple or complex, the alternatives are only a mouse click away. Thus aiding you in making the required decisions without any hesitation.

Going to new heights. Pallet rack system Normapal

Normapal:
Solid, robust and
long service life.

Your favourite for heavy loads

Normapal, the versatile pallet rack system from GEMAC helps to implement complex logistic concepts quickly and easily. Its comprehensive line of accessories makes Normapal more than just a simple pallet rack. Every imaginable application is possible: multi-pallet or single pallet storage, cable-reel storage or as drive-in, first in – first out or first in – last out racks.

Normapal is well suited for outdoor applications. The high-quality hot-dip zinc-coating according to DIN 50 976 guarantees a long service life.

- bolted frames
- hot rolled I-beams according to DIN 1025
- rugged epoxy-coating
- adjustable beam heights in increments of 50 mm
- safety accessories: corner upright protectors, back stops, etc.
- optimal usage of room heights though low-profile I-beams

Pallet rack system Normapal

The Normapal system consists of bolted frames which we deliver pre-assembled. This assures maximum flexibility for system modifications at a later date.

Normapal is suited for sales areas. For example: for large or heavy items in specialty markets or warehouse outlets.

Whatever your Future storage plans are, Normapal is the right choice.

Our strong-armed unit. Cantilever rack Screwfix

The strength of Screwfix is the safe storage of long goods, be it wood, metal or plastics. Even the heaviest items are no problem for it's solid, bolted cantilever arms. By adding shelves, Screwfix becomes a multifunctional storage unit.

For outdoor applications we deliver Screwfix in a hot-dipped zinc coated version, complete with roof and walls.

For lighter duty Screwfix's „little brothers“ Solidfix (completely welded) and Clampfix (variable clamped arms) provide the ideal alternatives.

If requested, we can teach Screwfix to drive...as a rack on wheels for optimal space usage.

- uprights and cantilever arms are hot rolled I-beams according to DIN 1025
- bolted cantilever arms for heavy loads
- cantilever arms adjustable in 100 mm increments
- comprehensive system accessories
- rugged epoxy-coatings
- hot-dipped zinc-coating for outdoor applications

Accessories: The adjustable safety stop even prevent pipes from rolling out of the rack.

This system goes to new heights. Shelving system Combifix

- snap-together assembly
- bolted frames
- uprights epoxy-coated, struts and cross bracing galvanized

As a Shelf system

- adjustable shelf heights in increments of 25 mm
- shelf widths of 1,010 and 1,310 mm (standard)
- galvanized shelves (standard) or epoxy coated

With the shelving system Combifix you can use the „air space“ in your warehouse. Combifix combines the advantages of the light and flexible snap-together assembly with solid bolted frames.

Combifix delivers what its name promises, because it's well suited

- as a wide span rack for storing large and heavy palletted goods
- as a first-in first-out rack for packages
- as a high-rise shelf for automatic storage systems, and
- especially as a shelving system for extreme loads

GEMAC shelves:
Triple safety through
triple folds

As wide span rack

- adjustable beam height in increments of 50 mm
- bay widths up to 2,700 mm
- suited for light euro-pallet storage
- rugged epoxy-coatings

Systematic storage for small parts. Shelving system Normafix

GEMAC®
YOUR GAIN

- snap-together assembly
- shelf height adjustable in 25 mm increments without tools
- full depth shelf supports
- galvanized shelves (optionally epoxy coated)
- uprights epoxy coated
- shelf widths of 1,010 mm and 1,310 mm (standard)

Normafix is the universal snap-together shelving system. That makes modifying the shelves a quick and easy task – naturally without special tools. Strong features of Normafix are its comprehensive list of system accessories combined with practical shelf dimensions. This means tailored to fit your requirements.

With Normafix you can build multi-storey or mobile storage systems, because the building blocks are all from the same modular system.

Cut your costs per square metre in half. Steel system platforms

Simply go to
new heights

Make use of the last space reserves in your warehouse – and cut your square metre costs for shelving and office systems in half as well. With the modular GEMAC structural steel system platforms you can build above existing areas and use your space right up to the ceiling.

The real pay-off comes in combination with our shelving and office systems, because ample space remains for work areas beneath the platform.

This system requires no bothersome cross-bracing or horizontal struts – you should take advantage of these features.

An additional application is the warehouse store with public traffic, because the structural steel system platform "raises" your sales area.

GEMAC fulfils all safety requirements; we help you get your building permit with our certified static calculations.

- completely bolted design
- support structure without troublesome cross-bracing
- cantilever design available
- minimum height requirements
- upright spacing up to 6000 mm (standard)
- 300 or 500 kg loading per m² (standard)
- rugged epoxy-coating

Don't waste even one centimetre – it's the only way to go

To each his own. Indoor Line partition wall system

Partition walls, that unite –
absolutely and individually
adaptable

Productive islands in the factory – make work enjoyable.

You want to divide rooms into individual or separate areas with flexibility and modular design. The partition wall system Indoor Line is the quick and economical solution. At the turn of a hand you create quiet areas without noise and dust, integrated into the storage or production areas. Generous glass fronts assure a bright and friendly atmosphere.

If you want to modify the installation at a later date – no problem: all elements can be disassembled and moved quickly and free of dust and grime.

- sturdy, snap-together design
- environmentally safe materials
- easy to clean
- corrosion protected through galvanized steel sheet metal
- tested sound insulation up to 39 dB depending upon the type
- heat insulating
- rugged epoxy-coating
- comprehensive accessories

The "feel good" offices. Indoor Line modular offices

Multipurpose offices directly where its happening have clear advantages: everything is within sight, short distances, efficient working. With GEMAC Indoor Line you create productive islands in your plant, such as supervisor offices, control- and operations rooms and multipurpose offices (laboratories, lunchrooms, conference rooms, dressing rooms). Special wishes such as sound insulation, special lighting or air conditioning can be gladly accommodated.

The prefabricated elements are assembled free of dust and grime. With a minimum of effort you create new space as needed.

GEMAC-modular office systems are unbeatable as double storey units. The structural steel support structure is completely integrated: that's how you can stack "feel good" offices on top of each other – with all the required accessories, stairways, etc. Just stack on another room – with GEMAC everything you need is from a single supplier.

Go to new heights. Double storey units

GEMAC®
YOUR GAIN

- sturdy, snap-together design
- environmentally safe materials
- easy to clean
- corrosion protected through galvanized steel sheet metal
- tested sound insulation up to 39 dB depending upon the type
- optional insulation glazing
- rugged epoxy-coating

INDOOR LINE

Tailored just for you. Individual solutions from GEMAC

- usage of system components
- individually designed
- static calculations as required

Complete space utilization and direct availability: storage of doors and frames of different sizes.

Individually conceived from one supplier: carpet storage with roof and walls, including sliding doors, for outdoor storage

With GEMAC storage systems you solve nearly all of your problems regarding storage, logistics and sales area design. Our strengths are customer oriented, individual planning and perfect project execution. Contact us about your wishes. We'll design a tailor made solution just for you.

Through the use of GEMAC-system components, even individual solutions can be economical. Remember, the least expensive solution isn't always the best one for you. Talk to us.

GEMAC guarantees quality

You receive a comprehensive safety guarantee for all GEMAC-products.

For quality assurance, we work together with the material inspection authority of North Rhine-Westphalia in Dortmund, Germany.

Static calculations are available upon request.

Our GEMAC safety certificate gives you final security.

GEMAC assembles for you

Our promise of quality applies to the final assembly and the commissioning of the equipment as well.

Our expert assembly personnel and their long years of experience assure fast and reliable assembly of GEMAC-systems.

GEMAC puts colour into the picture!

Colour as a quality factor?
Of course, because our epoxy-coatings are rugged.

Colour is a motivation factor – you may choose from the standard colour-pallet or order alternate colours of your own choice.

Shelving systems

Standard colours

Standard colours for our shelving systems:

- RAL 7032 (gravel gray)
- RAL 9002 (gray-white)
- RAL 1017 (safran yellow)
- RAL 5010 (gentian blue)

Additional colours are available upon request. Our shelving systems are also available with hot-dip zinc-coatings.

Modular office systems

Standard colours

Standard colours for our modular office systems:

- RAL 7032 (gravel gray)
- RAL 9002 (gray-white)
- RAL 7016 (anthracite gray)
- RAL 5010 (gentian blue)

in combination with:

Alternate colours are also available upon request.

Moldings are RAL 7016 (anthracite gray)

Hanover-Langenhagen

Rail connection (ICE):
Minden/Westphalia.

Wilhelm Busch sends greetings

The complete pallet of GEMAC-products has been developed and manufactured for many decades in Bückeburg, in beautiful Schaumburg, Germany.

A motivated staff of qualified employees stands behind our Products.

Wilhelm Busch (born in 1832), the grandfather of all modern cartoonists, is a famous son of Schaumburg.

It was here that he created his most well known fictional characters – „Max and Moritz“ and „The Pious Helena“.

Palace Bückeburg, residence of the royal family of Schaumburg-Lippe.
